[TRAIN2VALIDATE](#) is a strategic partnership in the field of higher education, which focuses on one of the European priorities, namely social inclusion. It originates from the development of easy-to-read (E2R) as an inclusive writing methodology with the purpose of producing easy-to-understand content and information for people with reading difficulties. The main goal of the project is the creation of new specific professional profiles for the production of easy-to-read materials, i.e. validators and facilitators.
